Baccarat

A Rare Gilt-Bronze Mounted Painted Opaline Glass Vase

Circa: French, Circa 1870

French, Circa 1870

43 x 0 cm (16 7/8 x 0 inches)

opaline glass Gilt-Bronze ormolu

The underside of the base mount stamped with the Baccarat cachet.

A Fine Gilt-Bronze Mounted Painted Opaline Glass Vase by Baccarat.

The underside of the base mount stamped with the Baccarat cachet.

This rare vase or jardiniere is of bell-crater form with an everted lip painted all over with a continuous scene of a wooded landscape with castle ruins, between red and gilt tooled interlaced borders. The vase is raised on a finely cast gilt-bronze base with charming putti herms holding laurel garlands.

French, Circa 1870.

Artist description:

Baccarat is the world's leading manufacturer of crystalware. Founded in 1764 under the patronage of Louis XV as Renault et Compagnie, the firm became known as the Compagnie des Cristalleries de Baccarat during the nineteenth Century.

The company began to flourish at the beginning of the Nineteenth Century, as the effects of the Napoleonic Wars abated, and its reputation was consolidated by the official approval from various sovereigns and heads of state. At the 1823 Exposition Nationale in Paris, it was Baccarat's crystalware that Louis XVIII was said to have particularly admired, appreciating its 'beautiful workmanship'. It was Charles X's visit to the crystalworks in 1828 however that had the most significant repercussions

for the company. Baccarat presented the monarch with a gift of two magnificent Medici Vases, a large crystal Ewer, a fifteen piece Tea Service and a five-piece Water Set. The king then ordered a dinner service for the Tuileries, while the Duchess d'Angoulême personally chose a set of eighteen glasses, described by her as '...sturdy, balanced, perfect'. Later Louis-Philippe and Napoléon II also visited the crystalworks and were followed by a succession of French presidents and foreign heads of state. François-Eugène de Fontenay (who joined the company in 1841) discovered that by the addition of the nickel oxide in the manufacturing process, a perfectly clear product, 'crystal glass', free of discolouration and imitating precious rock crystal was produced. This is just one of many technical innovations and improvements discovered by Baccarat, that make it the company it is today.

The Baccarat company was awarded a Gold medal at the French Exposition des Produits de l'Industrie in 1855 and has continued to carry off the top prizes ever since. In 1867 they exhibited a gigantic fountain twenty four feet tall, with a basin ten feet in diameter, which it was said 'simply took visitors breath away'.

With the continuing improvement in their manufacturing standards, the quality of Baccarat's 'crystal glass' improved and reached the highest level by the end of the century, competing successfully with the Bohemian glass industry. Baccarat 'crystal glass' is highly regarded, not only for its unusual clarity, but also for its great solidity and weight.
